About Us

Safety Talk was founded in 2015 under that name. It started as a small organization offering safety-related courses for students seeking careers in safety. In the beginning, there were only short-duration certificates with limited on-site practical training. Today, Safety Talk has evolved into an all-encompassing guide for students and companies who wish to learn about the importance of safety. Safety Talk also offers seminars and safety awareness classes in universities, schools, and other public areas to inform the public about how safety and health impact their lives.

Safety Talk is also working with corporations to understand their needs better and to provide a safe work environment for all employees. We are constantly developing new health and safety programs to meet the needs and requirements of modern, technologically advanced society.

Safety Talk is the only training firm to offer training on international safety standards set by the ILO (International Labor Organization), as well as Local Regulations and Laws provided by BIS (Bureau of Indian Standards), ensuring compliance with both international and national standards.

Safety Talk - Course Information

About Safety Talk Course

Safety Talk provides training on both international standards (ILO - International Labor Organization) and Local Regulations and Laws. This ensures compliance with both national and international safety requirements. The academy offers a range of courses, including:

- Advanced/Post Graduate Diplomas: In areas like Oil & Gas Safety, Industrial Safety, Construction Safety, Health Safety & Environment (HSE), and Fire & Safety
- Short Duration Training: Covering topics such as Scaffolding Safety, Electrical Safety, Work at Height Safety, and Confined Space Safety.
- International Certificate Courses: Including IOSH MS, OSHA 30Hrs, and NEBOSH IGC.
- On-Demand Training: Addressing specific needs like NFPA 70E, OSHA Standards, and Behavior-Based Safety.

Course Process

The Safety Talk training process is structured to ensure effective learning and assessment:

- User Registration: Interested individuals begin by registering for their chosen course.
- Language Selection: Users select their preferred language for the course materials and
- assessments.
- Course Selection: Users choose the specific safety course they wish to pursue.
- Course Content: Registered users gain access to the course materials, which they study at their own pace.
- Online Exam (Face & Screen Recording): Users undergo an online examination that includes face and screen recording, likely for proctoring and identity verification purposes.

If the user passes, they proceed to the Verification Interview. If the user fails, they are granted one opportunity to retake the Online Exam. If they pass the retake, they move on to the Verification Interview. If they fail the retake, the process ends.

- Verification Interview: Successful candidates participate in a verification interview, possibly to assess their understanding of the course material and confirm their identity.

If the user passes, they receive Certificate Assurance. If the user fails, they are given one opportunity for a re-interview. If they pass the re- interview, they receive Certificate Assurance. If they fail the re-interview, the process ends.

- Certificate Assurance: Upon successful completion of the course and assessments, candidates receive their certificate.

This process includes built-in quality measures, such as proctored online exams and verification interviews, with a provision for a single retake/re-interview to support candidate success.

Leading the Way in Safety Training & Compliance

In today's fast-paced world, workplace safety is more important than ever. At Safety Talk, we are dedicated to providing top-tier safety training that empowers individuals and businesses to create safer environments. Since our establishment in 2015, we have evolved from a small institution offering short-term safety courses into a comprehensive safety training and consulting organization.

A Journey of Growth and Excellence

Safety Talk began with a vision—to equip aspiring safety professionals with the knowledge they need to build successful careers. Initially, we provided short-duration certificate courses with limited onsite practical training. However, as industries grew more complex, so did the need for specialized safety programs.

Today, we cater to both students and corporate clients, offering in-depth guidance and customized safety training solutions that meet the highest standards.

Customized Training Programs Aligned with Global and Local Standards

Safety is not a one-size-fits-all concept. That's why Safety Talk develops training programs based on our clients' specific needs, ensuring full compliance with:

- ✅ International Labour Organization (ILO) safety
- ✅ standards Local government safety regulations

Our training programs help businesses mitigate risks, enhance workplace safety, and stay compliant with ever-evolving regulations.

Empowering Communities Through Safety Awareness

At Safety Talk, we believe that safety knowledge should extend beyond workplaces. That's why we actively conduct safety awareness sessions and seminars in:

- ✅ Schools
- ✅ Universities
- ✅ Public places

Safety Talk - Course Information

Through these initiatives, we educate communities on how safety measures impact their daily lives and overall well-being.

Partnering with Corporates to Build Safer Workplaces

- We go beyond just training—we work directly with corporate clients to:
- Assess their safety requirements
- Develop tailored safety programs
- Enhance workplace safety culture
- Ensure compliance with national and international safety laws

By fostering a proactive approach to workplace safety, we help organizations reduce incidents, improve productivity, and protect their workforce.

Revolutionizing Safety Training with Our LMS Platform

We have introduced an integrated LMS online platform. With just a single click, companies can:

Keep track of employee training records
Ensure compliance with safety regulations
Access training materials anytime, anywhere

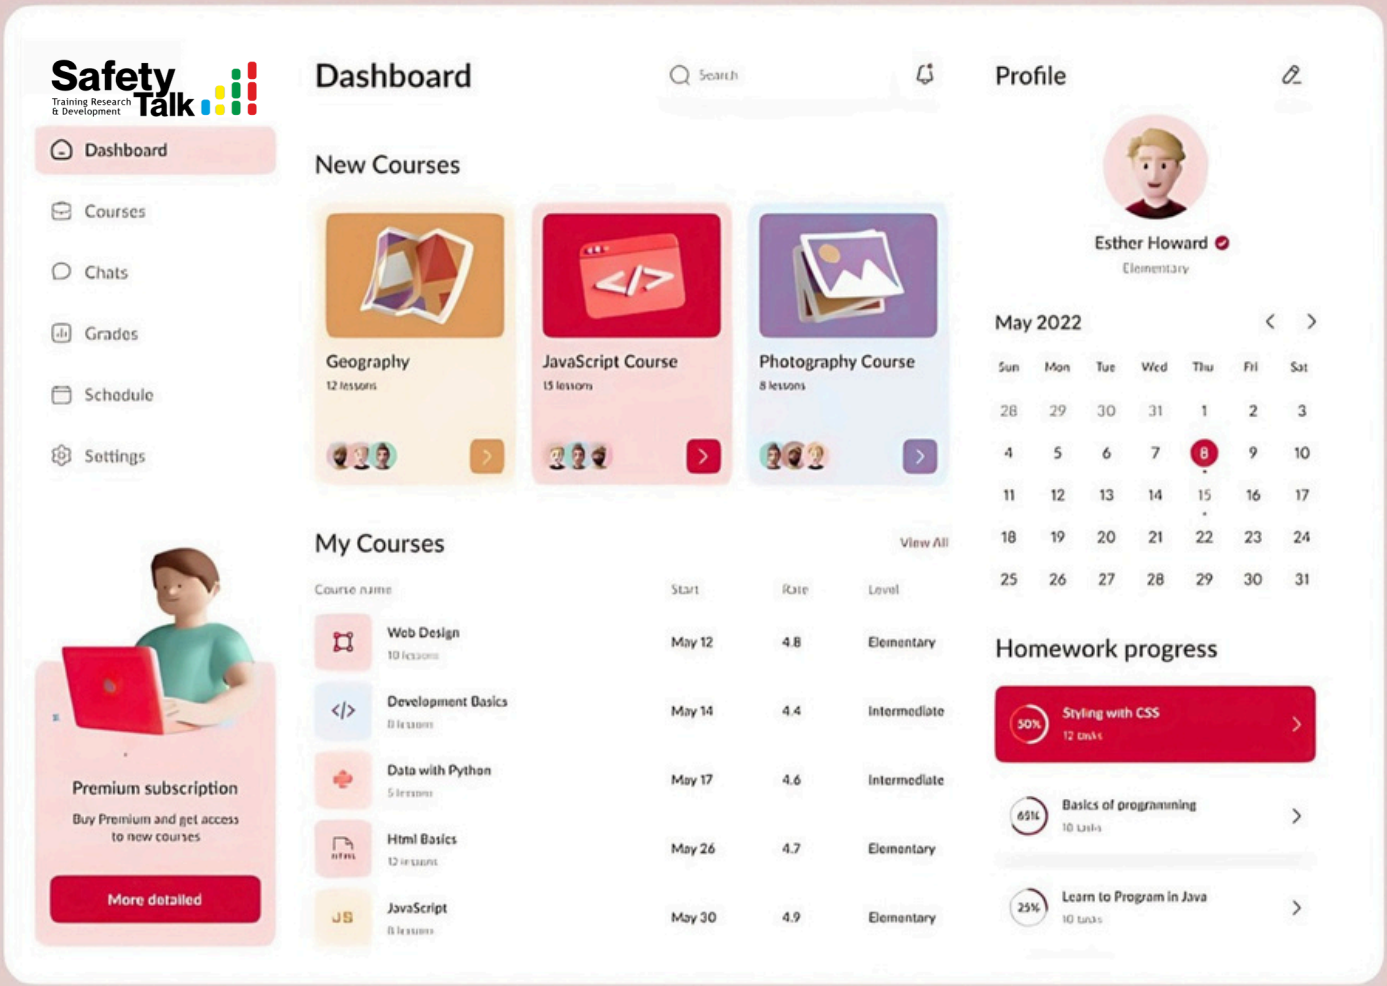

This innovation makes it easier than ever for businesses to stay ahead in safety training and compliance.

Commitment to Innovation in Safety

As technology advances, so do workplace risks. At Safety Talk, we continuously develop new health and safety programs to address the challenges of modern industries. Our goal is to stay ahead of emerging risks and equip our clients with the best safety solutions available.
